

# Spencer Park Primary School

## P.E.A.C.

## PROCEDURE

The Primary Extension and Challenge program is for children in Years 5 and 6. There are three cycles with a variety of courses for each level.

**The procedure for selection is as follows:**

- Children have sat a scaling test in Year Four which gives them a score to be used as an aid in selecting students. (Teachers to have a copy of this)
- Along with input from their classroom teachers, as to their suitability for particular topics, children are then offered courses by the coordinator.
- Children take home application forms and nominate for courses offered. These are then returned to the teacher in charge of PEAC who passes these on to the High School PEAC coordinator.
- The PEAC coordinator then selects as many students as can be accommodated in the courses and notifies the school. The coordinator passes this information onto the relevant children.
